

Preterminated fiber cables from NeoPro are a fast and cost effective way to deploy a fiber based video system. All cables are built to the highest quality standards and fully tested.

Our 3mm orange cables are UL rated for in wall riser spaces. Cable assemblies can be preinstalled onto new construction projects, pulled through conduit during trim out phase, or installed as a retrofit solution.

Our INVISAFIBER™ clear PVC cable assemblies are the perfect solution for retrofit jobs where there is no clean way to get from the TV back to the head end. INVISAFIBER™ virtually disappears when installed along baseboards, crown molding, or masonry. Get creative as you want going up and around doorways, ceilings, archways, etc. and solve your customers toughest challenges.

Both of these cable types are also available in bulk, and are compatible with our Fiber Field Termination Kit.

Neo Part#	Length (feet)	Description
32-00016	100	LC-LC simplex fiber, 50/125 ONFR riser rated, 3mm orange
32-00017	200	LC-LC simplex fiber, 50/125 ONFR riser rated, 3mm orange
32-00018	300	LC-LC simplex fiber, 50/125 ONFR riser rated, 3mm orange
32-00019	500	LC-LC simplex fiber, 50/125 ONFR riser rated, 3mm orange
